# BankNow® Treasury Services Secure Access Code Sign-In

For companies that do not originate ACH transactions, wire transactions, bill payments or positive pay decisions, tokens are no longer required. Treasury clients are now able to access BankNow® Treasury Services by using a secure access code instead of a PIN and RSA SecurID® token. The following steps will guide you through how to sign in to BankNow® Treasury Services successfully.

1. On the Texas Capital Bank website under Account Login, type in your username and click or tap the arrow button.

   Note: IBM® Security Trusteer Rapport® software is required to access BankNow Treasury Services to maximize customer protection, achieve sustainable fraud protection and meet regulatory compliance requirements. If you do not have Trusteer Rapport, please follow the instructions to download.

2. Enter your password and click **Login**.

3. You may be prompted to update your security questions. Once you have selected your questions and entered your answers, click or tap **Save**.
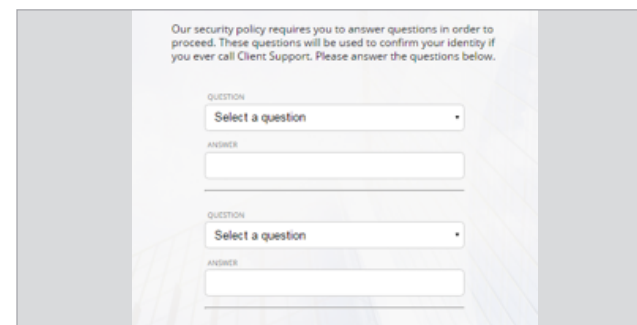

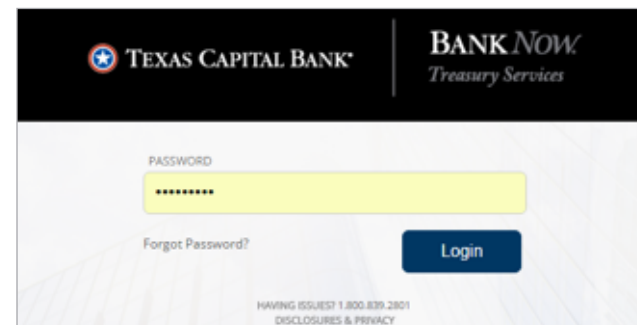

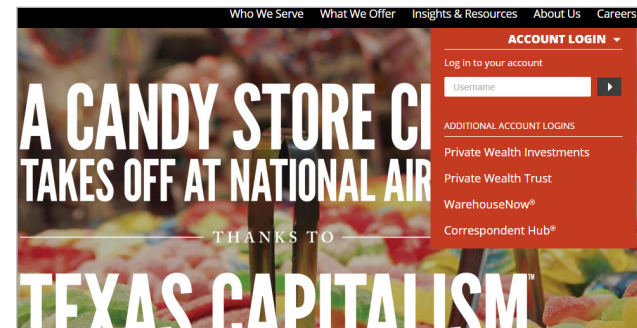

4. Select your target communication method (email, text or voice). The secure access code will be delivered to the selected target.

   Note: If you have not updated your contact information, please contact Treasury Support: treasurysupport@texascapitalbank.com or call 1.800.839.2801.

5. You will receive a secure message from Texas Capital Bank, via the selected target, with your eight-digit secure access code.

6. Type in the secure access code and click or tap **Submit**. You are now securely logged in to BankNow® Treasury Services.

7. Set your new password. Be sure to observe the requirements listed on the screen.

8. First-time users are shown their information for review. If any content is incorrect, please contact Treasury Support at treasurysupport@texascapitalbank.com to make corrections. Click **Next** to continue.

You are now securely logged in to BankNow Treasury Services!
